Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121 because the claims in the instant patent application are not the same as the claims in the PCT/SE00/01207:

Group I. Claims 2-7 and 9-14, drawn to a method of packaging an absorbent article, classified in Class 53, subclass unknown.

Group II. Claim 8, drawn to a pack of an absorbent article, classified in Class 206, subclass 494 and others.

The inventions are distinct, each from the other because of the following reasons:

Inventions [I] and [II] are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by providing the pack including a container and a lid instead of using at least one essentially impervious film material with impervious joins or seams.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.
